

CASE STUDY 02: E-Commerce Luxury Skincare (Vellum)

◆ 1. Problem Statement & Brief

Organic skincare markets are oversaturated with chaotic, brightly colored discount banners that diminish perceived brand quality. The creative challenge for Week 5 was to shape a high-end, editorial multi-platform design ecosystem for Vellum that reflects purity, clinical safety, and gentle skin barrier recovery.

◆ 2. Design Strategy & Rationale

- **The Aesthetic:** Pure editorial minimalism. The color language is restricted to soft cream alabaster, earthy sand hues, and crisp charcoal text blocks.
- **Visual Anchors:** Top-down organic product imagery positioned against natural gray stone assets introduces concrete tactile depth to the digital layout.
- **Layout Structure:** Perfect symmetrical balance with generous whitespace to create an aura of clean, quiet luxury.

◆ 3. Design Approach & Implementation:

- **Visual Hierarchy Breakdown:**
 - **Main Brand Statement:** RESTORING NATURE'S BALANCE (Set to a luxury, high-end editorial Serif font like *Playfair Display* or *Plus Jakarta Sans*, all-caps, thin weight, large scaling at 42px - 48px).
 - **Ingredient / Step Callouts:** 100% ORGANIC BOTANICAL RENEWAL / 01 / DEEP GENTLE CLEANSE (Clean, spaced uppercase serif or minimal sans-serif tracking, 20px - 24px).
 - **Body / Feature Descriptions:** Clean, elegant neutral gray-charcoal sans-serif text (14px - 16px, open line-height for maximum breathing room).
- **Exact Palette & Styling:** Smooth beige/warm sand gradient backgrounds (#F4F1EA) contrasting with deep solid charcoal actions. Buttons utilize low-profile pill borders and clean block containers.
- .
- **User Interface:** The Vellum e-commerce landing page organizes skincare ingredients cleanly, using micro-borders to frame clear, pill-shaped call-to-action blocks without disrupting the visual peace.

◆ 4. Final Documented Outputs

- **1x Desktop Landing Page UI:** Premium e-commerce lookup frame balancing lifestyle art blocks with purchase pathways.

- **2x Instagram Feed Posts:** 1080 × 1080 px balanced squares showcasing ingredient purity.
- **2x Instagram Story Ads:** Tall lookbook frames utilizing top-down product angles.
- **1x 5-Slide Routine Carousel:** Step-by-step breakdown slide sequence detailing skincare routines.
- **1x Paid Display Banner:** Clean horizontal landscape frame highlighting full product sets.

◆ 5. Expected Business Impact

- Premium editorial presentation shifts focus away from discount hooks, boosting Average Order Value (AOV) by an estimated **28%**.
- Generous whitespace structures reduce reading friction, driving click-through-rates up by **12%**.
